Subject: RE: Review/Input on Draft List of OR CZARA Issues to be T'ed Up for Management

Jayne, I'll let you know on Tuesday about what we're teeing up to management on pesticides. I'm going to talk with Alan tomorrow. It really has to do with the threshold question first in my mind.

Subject: Review/Input on Draft List of OR CZARA Issues to be T'ed Up for Management

Hi All,

Am compiling a list of Issues we are T-ing up for management. Please review for accuracy and add the missing information or additional issues.

OR CZARA Issue List

1. Whether new management measures can (attorneys say yes) or should be added for ag.
2. Whether ag MMs continues to meet threshold for approvability given new information on the assumptions underlying our previous interim decision
3. Penalty amount for EPA (baseline? Compounding?)
4. Whether EPA/NOAA would approve additional forestry MMs for riparian if riparian rule includes management measures that adequately protect riparian areas of medium and small fish bearing streams but fails to address non-fish bearing streams.
5. Threshold for back-up enforcement authority for OSDS
6. Concerns about Oregon's monitoring program, even though EPA/NOAA did not public notice those MMs.
7. Whether EPA/NOAA can approve additional MMs for Forestry for roads, given the following deficiencies: legacy roads not addressed....
8. Whether EPA/NOAA can approve additional MMs for forestry/pesticides....

Thanks!
